Score	63%

PROJECTS

SEISMIC TREMOR ALERT AND DOWNPOUR CAUTION

The goal of this project is to identify seismic tremors and downpours so that we can issuereal-time alert warnings when they may result in earthquakes and rain

TRACKIT

This application is mainly focused on achieving an affordable Vehicke tracking system for every road transport vehicles. This application is designed for local areaprivate buses. The bus time schedule is the important key for our application. Totrack the bus location , we need GPS but every bus management were not intrested in spending on GPS. So we use smartphone GPS to track the location of the bus.

INTERNSHIPS – ONLINE MODE

Phoenix Research & IT Solutions | July 2022 - August 2022

-Throughout this internship, I garnered invaluable insights from seasoned IT professionals on Java application development, acquiring fresh skills in the process.
